

**RITA B. HUFF HUMANE SOCIETY  
TETANUS VACCINE RELEASE LETTER**

The bacteria that causes tetanus can be found in soil, dust, and manure. Tetanus could enter the body through cuts, puncture wounds, and burns.

Non-sterile injections of drugs could also lead to infection with Clostridium Tetanus.

It is our policy to have all volunteers vaccinated with the tetanus vaccine.

**I, \_\_\_\_\_ hereby waive all rights to hold Rita B. Huff Humane Society responsible for any injuries or medical issues contracted by not receiving the tetanus vaccine.**
